```
 1 //Grant dawson COSC 220 Project 1
 2 This is a project to hold students information and class they have taken or plan to
 3
 4 Each StudentDB class is one school.
 5
 6 This is a interactive database of students and their courses they have take.
 7 The program is total in the command promt and there is no need for the end user to use the
   main.cpp
 8
 9 Students hold the students:
10   Name
11   Date of birth (DOB)
12   Major : This is made with a list and as more people use the program the list may get
      longer
13
14 Courses hold the students courses they have take and the info of the course:
15   Department : This is sperate from the majors list but also a expanding list the user
      picks from and can add too
16   Course number
17   Semester
18   Grade : This is another list the user picks from but can't be add too (N is for no final
      grade yet)
19
20 This will hold as many students/courses your ram will allow
21
```
